Whole Love™

Intended for releasing feelings of abandonment, and for letting animals know that they are loved. Use for giving comfort and love, healing emotions, or building trust and new beginnings.

How to Use Gem Essences for Animals™

The Gem Essences for Animals™ are conveniently packaged in 1 oz. (30 ml) ready-to-use spray mist bottles.

Using the Essences. Suggested dosage is one to three spritzes of each essence applied topically three times a day.

For animals new to using essences, or who are sick or fragile, it is suggested to initially use fewer spritzes per essence and then adjust accordingly.

It is recommended to use the essences three times a day for at least three weeks. For chronic issues, or long-term care, it is suggested to use the essences daily. For maintenance care, use the sprays three times a week, or as needed.

Applying the Essences. To use, hold the bottle about five to seven inches (12-18 cm) away from the body and spritz along the length of the back or on particular areas of concern. The spray can also be spritzed above the body to let the mist fall gently on to the animal. Alternately, spray the mist on your hand and then stroke the essence on the animal.

The essences work well separately or paired with other essences. When a combination of essences is used wait a few minutes between spraying each of the essences.

Be creative with mixing and matching essences based on the animal's needs.
